The aim of this bi-annual User Meeting is to bring together users of PHI equipment, with the staff of Physical Electronics. There is a long history with this meeting, dating back to the early 1980s, when the first User Meeting was established. In this tradition, we are happy once again to provide this platform for the exchange of information on PHI equipment, scientific topics, and your own experiences with other users of PHI equipment. The meeting will be a mix of presentations by the PHI users and PHI staff. We invite all users to propose to us any topic they would like to present at the meeting, and inform us ahead of time regarding any topics they would like to see covered in the meeting. Please use the online or pdf registration forms for this.
